DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4-7 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Okazaki et al. US 5,915,416.

Okazaki discloses a solenoid valve having a valve housing supporting a coil 48; a ball 51 in the valve housing, a valve seat 41e in the valve housing, and a rod 56 reciprocatingly disposed in the valve housing between a deenergized configuration, wherein the coil is deenergized and the ball is against the valve seat, and an energized configuration, wherein the coil is energized and the rod is urged against the ball to move the ball away from the valve seat, wherein the valve housing defines the valve seat and is made integrally with a winding bay 41, the coil being wound in the winding bay. The valve housing has a ball retainer rib 52 defining a supply port 42 having a first diameter and the ball between the rib and the valve seat in a second diameter larger than the first diameter. The valve housing defines a control port 43 and an exhaust port 44. A vehicle fluid system communicates with the valve. The valve has a primary plate 45 and a terminal 46 with the housing injection molded around the plate and terminal to form the valve seat and winding bay.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Okazaki et al. US 5,915,416 in view of Teranishi US 5,282,329.

Okazaki lacks the rod distanced from the ball in the deenergized position. Teranishi discloses a rod 25 distanced from a ball 17 in the deenergized position. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the rod and ball as disclosed by Okazaki with the rod distanced from the ball by .1 to .8 mm in order to reduce hysteresis (col. 5, lines 39-43) as disclosed by Teranishi.

Response to Arguments

- 5. Applicant's arguments filed March 3, 2006 have been fully considered but they are not persuasive.
- 6. Regarding applicant's argument that the ball retainer of Okazaki is a separate piece that is thermally caulked into place, the examiner maintains the rejection as this meets applicant's claim language that "the valve housing is formed with a least one ball retainer rib" since the rib of Okazaki is rigid with the rest of the valve housing.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Bastianelli whose telephone number is (571) 272-4921. The examiner can normally be reached on M-F (9:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
